### ***Our Services***

- Interior and Exterior Foundation Waterproofing
- Foundation Repair for Bowed and Cracked Walls
- Sump Pumps, Dehumidifiers, and EZBreathe Ventilation Systems
- Crawl Space Environment Control

### ***Our Company***

America's Basement Contractor is a family owned and operated independent company. Our business is focused on building and maintaining consultative relationships with every client and providing them with customized solutions. We specialize in both exterior (positive side) and interior (negative side) residential and commercial waterproofing, as well as foundation stabilization, mold remediation, and crawl space encapsulation. ABC is not a "franchise". We strive to maintain a high construction standard on every project and carefully choose all materials from trusted vendors. Our mission is to provide each client with the satisfaction of knowing that their project has been done right the first time at a reasonable cost.

### ***Our Values***

We pride ourselves on upholding traditional American values and business ethics; independence, integrity, value for money, and using quality materials made in the U.S.A. whenever possible. We differentiate ourselves with outstanding communication and customer service. We understand that this type of work is an investment in your home or property and will recommend right-sized, comprehensive solutions that align with your expectations.

### ***Our Highlights***

- Independent, family owned and operated specialty contractor
- Excellent customer service, timely response from our staff
- Quality materials at reasonable prices from U.S. manufacturers
- Business integrity and honesty
- Accurate assessment of your project with custom solutions
- Respect for your property, time, and money
- Safe US DOT Drivers with medical cards
- Fully Insured

### ***Our Culture***

Previous customers have been pleased with our presentation style, capabilities, and personal touch. We take the time to educate our clients, walk them through the process, explain the products, and communicate throughout the project. We view each job as unique and will identify your water/structural/mold problems, create cost-effective solutions, remedy the issues with materials from trusted vendors, and complete the job to spec and budget. Your calls will be taken, your questions will be answered, and any service needs will be quickly resolved by our staff.

### ***Our People***

As an independent, family owned company, we employ experienced W-2 crews with Worker's Compensation insurance and do not use 1099 subcontractors. Our employees will treat your home and property with respect. We are your neighbors and seek to make our customers feel that they made the right choice by choosing America's Basement Contractor.

### ***Our Interior Waterproofing Process & Materials***

We use high quality, tested materials made in the USA whenever possible. We use a deep trench system in front of the footer for installing QuikFlo heavy duty interior footer drains, which are International Code Council approved for residential use. This pipe is designed to collect water from the foundation block and from hydrostatic pressure, often found in this area. Combined with a reliable sump pump, we are able to divert water out of your foundation. Our competitors use standard PVC or corrugated pipes which carry a lesser volume of water. We offer a Dry for Life lifetime transferable warranty on our interior waterproofing systems.

### ***Our Foundation Repair Process & Materials***

Timely foundation repairs and reinforcement can save a foundation when completed prior to structural damage. We are certified installers for Grip-Tite® Manufacturing Company Wall Anchors, The Reinforcer® Carbon Fiber Straps, and Rhino Carbon Fiber™ and will make informed recommendations regarding foundation repairs for bowing or cracked walls with manufacturer warranties.
